Cohort Retention Rate (%) by month

Year	1	2	3	4	5	6	7	8
2016	2.15	1.64	1.52	1.84	1.87	1.84	1.80	1.5
2017	1.39	2.23	1.89	1.85	3.11	2.53	2.57	2.5
2018	3.87	4.06	4.19	3.61	3.99	4.28	5.44	4.2
2019	5.19	4.10	4.45	4.63	4.34	4.48	4.59	3.5
2020	2.85	0.53	0.63	1.27	1.16	0.84	0.53	1.0
Average	3.21	2.88	2.91	2.91	3.20	3.15	3.46	3.0

- **Average retention** of 3.21% after 1 month => ~97% of customers do not return the following month after their first purchase.
- **Monthly retention** varies significantly (~0-17%), suggesting **sporadic repurchase behavior** rather than consistent loyalty.
- **At Risk** have the widest range in **Average retention rate** (~3.39-9.55), peak retention rivals the highest performers while their floor still exceeds most segments.

Recommendation

PROTECTING

- For **Whale, VIP** and **Loyal Customers**.
- Exclusive offer, early access/release.
- Set up **Recency** warning, personal reach-out after about every **2-3 months**.
- Target **55+** group, dominating both segments, especially **Male Whale**

WIN BACK

- Most likely for **Lapsing** and **At Risk**.
- **At Risk** is highly reactive within **6 months** from last order (Averagely **~7-9% Retention Rate**) => best time to win back.
- **Lapsing** spend more, less often, push for **relevance (new category)**.
- **Female** in **At Risk** generate more revenue => **gender-specific** offer recommened.

REACTIVATING

- For **Hibernated**.
- Reach out after **~25 months** base on average **Recency**.
- **New drops** campaign will fit more, since they have decent **average spending**, just long **inactivity**.
- **Online** will be a better approach.

DEVELOPING

- For **New** and **Potential Loyal**.
- **~97%** of **New Customers** don't come back after **1 months** => leverage the **1st 90 days** to keep them engaged.
- **Potential Loyal** are active quite **recent** but but not committed => **more offers and loyalty programs**
- Utilise Online channel more to acquire and keep more New Customers
